Dear Broadband Council,

Following up on my public comments shared on November 4, 2020 during the virtual meeting on Modeling, Mapping and Data, I submit the following suggestions for inclusion in the California Broadband for All Action Plan, Cross-Cutting Actions that Support All Goals, item 1.A.;

- i. Collect address level data quarterly from all broadband providers within the state, including:
 - i. Maximum broadband speed currently available and advertised at specific location
 - ii. Currently delivered broadband service speed at specific location
 - iii. Cost of broadband service currently provided at specific location

Thank you for the opportunity to provide input and comment.

Best regards,

Tom Mullen
